SCHOLAR Lesson Outline

Task description

Computer task

Get pupils to navigate to the correct topic - Higher (CfE) Chemistry Unit 1 Topic 1.9 - End of Unit Test. Navigate through the topic and complete the end of topic test under test conditions.

Students should be familiar with how to use their data books to source periodicity information.

Whole class

Give feedback to students on their progress.

Display a report of the exercise.

SCHOLAR Lesson Outline

| | |
|--------------------------------------|---|
| Differentiation (Alternative use) | With an able group of students, you may wish to set this as a homework task to review the unit when you have completed it. |
| Hints & Tips | <p>This task is best done individually with feedback given individually to each student.</p> <p>Some teachers like to generate a report while students are logged in so that they can be shown what the teacher can see. This will highlight progress and any pupils who are just clicking reveal, as full marks can only be achieved by entering correct answers.</p> <p>There is online training available to help you learn how to do this. When you are logged in you will see a course called Succeed with SCHOLAR. Unit 1 Topic 7 introduces you to the reporting system.</p> |
| Notes | <p>Pupils will need access to a data book.</p> <p>Students should have access to a calculator for rate calculations.</p> <p>The SCHOLAR section of this material should take approx 30 minutes.</p> |
